

Best Practice II

1. Title: Employability, Entrepreneurship and Innovation Enhancement Cell (E²IEC)

2. Objectives:

- I. **To enhance employability by holistic development of students**
- II. **Fostering Entrepreneurial Mindset:** Cultivating a culture of entrepreneurship among students, by providing them with the knowledge, skills, and motivation to explore business ventures.
- III. **Encouraging Innovation:** Promoting the development of innovative ideas and encouraging the application of new technologies and business models.

3. The context:

The Employability, Entrepreneurship, and Innovation Enhancement Cell (E²IEC) is a dedicated cell within the institute which aims to prepare students for employability, encourage entrepreneurial thinking and foster innovative culture.

4. The Practice

The Institute has taken initiative to conduct student assessment to identify training needs. The E²IEC cell calls for innovative ideas during each semester and projects are shortlisted for real time implementation. Also, the Institute cultivates entrepreneurial mind-set among students.

5. Evidence of Success

Sr No	Particulars
1	SHL Assessment helped in identifying the training needs and supporting students in placements.
2	Students transition into Entrepreneurs
3	Carbon Emission Calculator Project Development for Quality Management System, Pune

6. Problems Encountered:

- Students may take time to build techno commercially viable innovative projects / products.
- Preparing student mind-set for entrepreneurship instead of getting attracted towards lucrative offers from companies.

7. Resources Required:

- Networking with various companies
- Interaction with successful entrepreneurs.

Problem Statement :-

Problem Statement: Develop a Python-based carbon emission

Calculator to address the growing concern of environmental sustainability. The calculator should allow users to input various parameters, such as transportation methods, energy consumption, and lifestyle choices, and provide an accurate estimation of their carbon footprint. The goal is to empower individuals and businesses with a tool that promotes awareness of their environmental impact and encourages the adoption of eco-friendly practices.

Description:-

The project aims to create a Python-based carbon emission calculator to assist users in estimating their carbon footprint. The calculator will consider factors like transportation, energy usage, and lifestyle choices, providing a comprehensive overview of individual or business environmental impact. The objective is to raise awareness about carbon emissions and promote sustainable practices. The user-friendly tool will empower individuals and businesses to make informed decisions, fostering a commitment to reducing their carbon footprint for a more sustainable future.

Module's Specification:-

User Input Module:

Collects user input regarding various factors contributing to carbon emissions, such as transportation Methods, energy consumption, and lifestyle choices.

Calculation Module:

Performs calculations based on the user inputs to estimate carbon emissions. Includes algorithms and formulas to convert user data into a carbon footprint estimate.

Data Validation Module:

Ensures that the user input is valid and within reasonable ranges. Handles potential errors or outliers gracefully.

Results and Reporting Module:

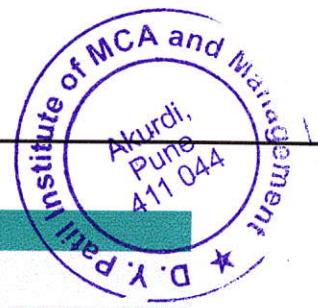

Displays the calculated carbon footprint to the user in a clear and understandable format. Generates reports or visualizations to illustrate the impact of different activities on carbon emissions.

Database Module (Optional):

Stores user profiles and historical data for tracking and analysis. Enables users to review their carbon footprint over time.

Report and Graph Generation Module:

Generates an emission report to create awareness and displays interactive graphs to visualize emission trends over time.

Screenshots:

Carbon Emission Calculator

Select a Device:
Fan

Enter Usage Hours:

The Fan emits approximately 4.20 kg of CO₂ when used for 3.0 hours with electricity as the energy source.

Your emissions are below the low benchmark. Great job!

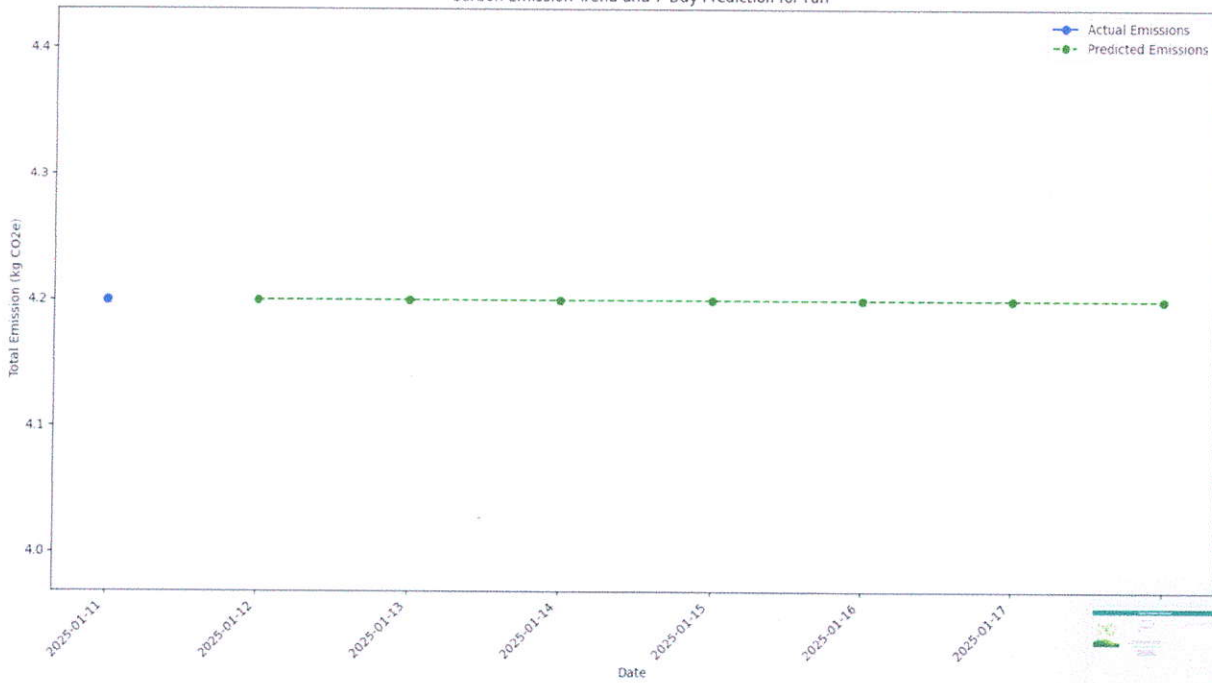

Suggestions to reduce emissions:
- Limit air conditioning usage.
- Use public transport or carpool.
- Switch to energy-efficient appliances.

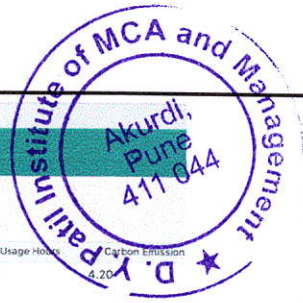

Device	Usage Hours	Carbon Emission
Fan	3.0	4.20

Enhanced Carbon Emission Calculator

Hello SANKET,

A big thank you for being a part of Eduteck Family.

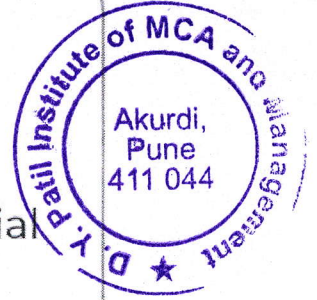

I am extremely delighted to extend a very special and warm welcome to you. Hearty congratulations and welcome aboard.

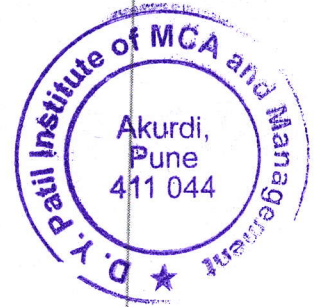

Eduteck is born out of a heartfelt commitment of providing quality education to deserving students across India at an affordable price using the modern technology. Our QR Coded Smart books are a much needed innovation in the field of education that combines both Physical and Digital platforms through thousands of educational videos based on QR codes. This effort of ours has been well appreciated and widely recognized by prominent institutions and citizens of India and we are proud of our accomplishments within a short period of time.

Inspired by the tremendous response we have received so far; we intend to reach out to every nook and corner of India. We sincerely request you to make use of our Referral System and help us reach out to record number of students through word of mouth. Interestingly, if you can put in quality efforts with your team, Eduteck can be an extremely fulfilling career option in Phygital education too. It can earn you lucrative financial benefits, gratitude from beneficiary students and blessings from their parents.

So, go all out and help us reach out to masses. I wish you all the very best. May all your dreams come true.

- Mr. Nilesh Khedekar

Mean Scores

We need to start assessing early!

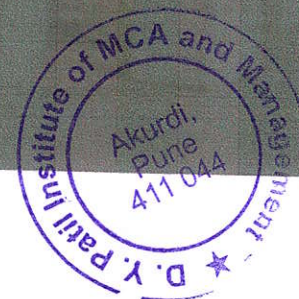

Getting Job Ready!

80% engineering candidates are not employable for any job in the knowledge economy.

How do we make them ready?

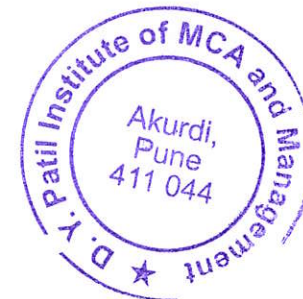

Can we look at increasing internships to give them real life exposures?

Self Learning

- Are Internships the only solution?
- Students also need to invest in themselves to improve their own employability quotient.
- How can they do that?

Going back to the drawing board

- Early Assessments need to be built as a part of the curriculum
- More stress on industry exposure through Internships
- Investments in Self learning
- Embrace new-age skill sets
